

TSSA Forms Software Version 1.10 Release Notes

New enhancements to the program include:

- ▶ A field for the facility's contact e-mail added as a default setting (E-mail field is limited to 39 characters; must be added to your default settings to appear on leases and other forms).
- ▶ All vacate forms have been updated. Now, tenants are required to remove items from units "during office or gate hours, whichever is later," rather than by midnight.
- ▶ Forms used for vehicle and boat foreclosures (TDMV and TPWD forms) have been updated to reflect the current versions available from these agencies.
